

# Everything I Ever Needed to Know about Classroom Management, I Learned in Kindergarten

## STAR Team

---

New Tech Network Project Spotlight  
@ St. Charles Satellite Center

---

### Students Teaching & Reaching (STAR)

The STAR course is designed to offer students the opportunity to explore the varied field of education through active engagement and real-life teaching experiences.

Team members will be exposed to learning theories, teaching methodology, and educational pedagogy while learning about the history of education, child development, lesson design, and educational philosophy.

Team members will put theory to practice while developing a reflective disposition. Successful completion of the course will earn STAR team members articulated credit with most Louisiana colleges and universities.

Lauren Lanoux, Maddison LeBlanc, Grace Lacour, Mariah Allemand, Tabitha Tabb, Caitlin Hof, Valarie Maronge, Trinity Miller

## Guest Assessor Reflections Post-Presentation

Guest assessors included school district personnel - including the Superintendent, Assistant Superintendent of Curriculum, Instruction, and Assessment - as well as student teachers from across the Parish, and education faculty from the University of New Orleans and Southeastern Louisiana University.

"We used to have people standing in line to get a job at the Parish, but we have a teacher shortage now. This program is a huge recruiting opportunity for us!"

- Felecia Gomez-Walker  
Superintendent, St. Charles Parish Public Schools

## STAR Standards in this Project

- STAR students will explain the role management plays in the classroom and school
- The student will assess the impact of school climate and organization on learning
- Define classroom management (part of what you need to be a teacher)
- Define time management and discuss its relationship to learning
- Provide examples of an "inviting" and "uninviting" classroom and/or school
- Examine how the physical arrangement of a classroom impacts learning
- Identify behavior management strategies that are proactive
- Examine various methods for decreasing conflict
